Macro MCP Server

MODEL CONTEXT PROTOCOL

144	1	0
ICONS	TOOL CALL	MANUAL STEPS

AI agents that **scaffold, import, and explore** the Macro Desktop monorepo — without asking you how it works.

11 Tools

DO THINGS

- `import_figma_app` — zip → OpenFin-registered React app
- `amps_create_mfe` — live AMPS topic → Angular/React MFE + AG Grid
- `amps_explore` — topics, SOW queries, schema
- `scaffold_angular_app` / `scaffold_react_app`
- `scaffold_library` — new shared lib + path alias
- `register_openfin_app` — Home + Dock + Store
- `list_icons` · `list_libraries` · `get_library_api`
- `get_commands` — all npm / nx scripts

12 Resources

KNOW THINGS (MACRO://)

- `architecture` — monorepo layout & data flow
- `tech-stack` — NX 22, Angular 21, React 19, AG Grid 35
- `libraries` — catalog of `@macro/*` libs
- `theming` — single-source-of-truth theming rules
- `openfin` — manifest + FDC3 conventions
- `data-connectivity` — AMPS / Solace / NATS
- `market-data-server` — mock WS endpoints
- `testing` — Jest · Vitest · Playwright
- `lob-guide` · `figma-workflow`
- `templates/angular` · `templates/react`

6 Prompts

START THINGS

- `create-angular-app` — new Angular LOB, end-to-end
- `create-react-app` — new React LOB, end-to-end
- `add-grid-component` — AG Grid + ColDefs + updateRows$
- `add-fdc3-context` — broadcast + listen wiring
- `add-theme-support` — dark/light via macro-design
- `add-data-connectivity` — transports + conflation

From "Figma zip" → running OpenFin view in a single tool call. Port wired · deps installed · Home/Dock/Store registered · icon auto-picked · start script added.

`Claude Code · Cursor · Copilot · JetBrains`
